If more than one search is submitted, please prioritize searches in order of need.

Please provide a detailed statement of the search topic, and describe as specifically as possible the subject matter to be searched. Include the elected species or structures, keywords, synonyms, acronyms, and registry numbers, and combine with the concept or utility of the invention. Define any terms that may have a special meaning. Give examples or relevant citations, authors, etc, if known. Please attach a copy of the cover sheet, pertinent claims, and abstract.

Title of Invention: Monomers containing at least one biaryl unit and polymers and derivatives prepared therefrom

Inventors (please provide full names):

David A. Bayles and John T. Bendler

Earliest Priority Filing Date: 3/21/03

For Sequence Searches Only Please include all pertinent information (parent, child, divisional, or issued patent) and the appropriate serial number.
